Objective

Looking for a software engineering role in a technology company where I can utilize my proficiency in full-stack development and passion for innovation to design and develop cutting-edge software solutions, while actively contributing to the company's product development and market competitiveness.

Skills

- Proficient in C, Java, Python, CSS, HTML, OCaml, JavaScript, Bash, and MIPS assembly language
- Computer organizational skills: Excel, Word, Google Sheets
- Advanced mathematical skills
- Excellent debugging skills

- Flexible and adaptive to change or ambiguity
- Problem solving and critical thinking
- Advanced interpersonal and communication skills
- Thrives in a fast paced environment
- Teamwork and Collaboration
- Leadership

Experience

Summer Program in Coding for Virtual Reality | Technische Universität Berlin - Berlin, Germany | 07/2023

- Gained a comprehensive understanding of UX and UI principles and its significance in the context of extended reality.
- Developed and deployed a VR game using Unity and C#.
- Conducted user testing sessions and acquired proficiency in analyzing and incorporating user feedback into iterative app development.

Competitive Analyst and Content Management | PartsNet Inc. - Oakville, ON | 11/2019 - 09/2021

- Managed and enhanced competitive analysis system to optimize product pricing and ensure market competitiveness.
- Collaborated cross-functionally to support fulfillment activities and streamline pricing processes.
- Stayed informed on industry trends and competitor pricing strategies.

Assistant Dance Instructor | Burlington Dance Academy - Burlington, ON | 09/2016 - 06/2019

- Delivered engaging dance lessons specializing in acrobatics, jazz, and hip hop for students aged 4-12.
- Introduced students to fundamental dance techniques and fostered artistic development through carefully-crafted lessons, promoting creativity and self-expression.
- Provided personalized instruction, monitoring progress and offering constructive feedback, tailoring instruction to meet each student's unique needs and abilities.

Education

McGill University, Montréal, QC

B.Sc. in Software Engineering

Expected graduation date 2025
